Scientific Name: Carcharodon carcharias

Also known as the great white, white pointer, or white death, is a species of large lamniform shark which can be found in the coastal surface waters of all the major oceans. The great white shark is one of the primary predators of marine mammals. It is also known to prey upon a variety of other marine animals, including fish and seabirds. It will occasionally attack a human, though humans are not its intended meal.

LENGTH: ♂ 11-13 ft ♀ 15-16 ft

LIFESPAN: 28 years

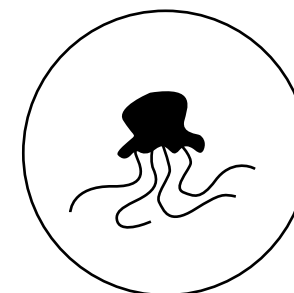

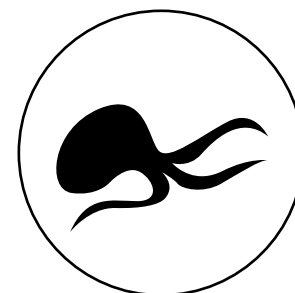

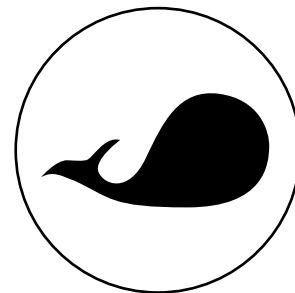

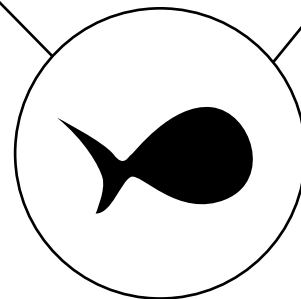

DEPTH: 130 - 700 ft

STATUS: PROTECTED
